www.linkedin.com/in/subham-das-datascientist (LinkedIn)

## Top Skills

Work-based Learning
Data Intelligence
Exploratory Data Analysis

## Languages

English (Professional Working)
odia (Limited Working)
Hindi (Professional Working)

## Certifications

Apache Spark Developer using Python
Artificial Intelligence Engineer
Data Science Master Program Capstone Project
BCG - Data Science Job Simulation
Python for Data Science Professional

# Subham Das

AI/ML Engineer | LLMs, Agentic AI, Vector Databases amp; Scalable Backends | Ex-Software Apprentice @ Fidelity Investments
Bengaluru, Karnataka, India

## Summary

I build production-grade GenAI systems — not prototypes.At Fidelity Investments, I engineered an enterprise RAG chatbot (Confluence + SharePoint integration) and cut Docker image sizes by 40%, accelerating deployment cycles.Independently, I've built:→ Dora AI — multimodal RegTech system for EU DORA compliance using GPT-4o→ NL-to-SQL systems hitting 94% accuracy for non-technical analysts→ Latency optimization reducing P95 response time by 67% via LLM migrationCore stack: LangChain • LangGraph • RAG (FAISS/Pinecone) • FastAPI • Django • AWS (Lambda, S3) • Docker • GPT-4oI'm looking for full-time AI/ML Engineer or GenAI Engineer roles where I can keep shipping systems that move from notebook to production.Open to opportunities — let's connect.

## Experience

### Fidelity Investments

1 year 1 month

#### Apprentice

September 2025 - September 2026 (1 year 1 month)
Bengaluru, Karnataka, India

#### Software Engineer

September 2025 - September 2026 (1 year 1 month)

Cut deployment cycle time by 40% by standardizing Docker multi-stage builds across the team's containerization pipeline

Built an enterprise RAG chatbot integrating Confluence + SharePoint APIs, eliminating manual search time for internal knowledge queries

Secured OAuth approval for a new internal AI tool by designing and shipping a full Django-based demo application with end-to-end testing

Diagnosed critical production failures via Splunk root-cause analysis, reporting findings to cloud teams under strict compliance (DARN) protocols

Built PowerBI dashboards giving leadership real-time visibility into system metrics

### SPHERE SOFT SOLUTIONS INDIA PRIVATE LIMITED

Artificial Intelligence Intern

June 2025 - September 2025 (4 months)

Hyderabad, Telangana, India

As an AI Intern at Sphere Soft Solution, I worked on developing and optimizing intelligent chatbot and automation solutions. My internship focused on building end-to-end systems that integrated natural language processing with real-time data handling.

Key contributions included designing conversational workflows, fine-tuning machine learning models, and implementing backend APIs to enhance response accuracy and speed. I collaborated with cross-functional teams to deliver scalable AI features aligned with client requirements.

This experience helped me strengthen my skills in Python, FastAPI, and LLM integration, while deepening my understanding of practical AI deployment in production environments.

## Education

### Biju Patnaik University of Technology, Odisha

Bachelor's Degree, Computer Engineering · (September 2021 - May 2024)

### Indira Gandhi Institute Of Technology

Diploma, Electrical Engineering · (August 2018 - May 2021)

### Ghanshyam Hemalata Vidyamandir

10th · (April 2016 - August 2016)

### Synergy Institute of Engineering and Technology

Bachelor of Technology, Computer Engineering
